Utilizing Public Space as a Recreational Sports Area Wahyudin, Saharullah 1 , Andi Atsam Mappanyukki 2 Universitas Negeri Makassar, Faculty of Sport Science , Banta - Bantaeng Road, Rappocini, Makassar 90222, Indonesia Abstract : This research aims to elaborate the community interest and motivation to utilize the public space as recreational sports through Car Free Day Program in the Losari Beach in Makassar City.

The sample in the study amounted to 60 people taken by random sampling from the community who do the sports in the car - free day program with aged between 15 - 35 years. The results showed that the community has very high interest to do the recreational sports in public space based on the mean value is 83.56. Furthermore, the motivation of the city also in a very high category with a mean value is 82.02.

The research suggests that the local government should support Car Free Day program and develop in the broader area. Keywords : Public Space, Recreational, Sports 1.

Introduction The sports as human activities are not only for a chance a medal or chance to win muscle, but games have a complex issue of achievement.

Sport has many functions for a human such as: developing of quality human resources, improving the quality of life, improving the physical health , mental, social and emotional [1] . Many various forms of action sports. Human is doing sports as part of the educational program in the school or universities. Many humans do sports as recreational terms [2] . The other side, there is sports activity has done for health purpose.

Furthermore, there was young human is doing sports for to achieve a feat highest [3] . In many cities in the world, the increasing number of the population need s the broa der area to doing sports. Makassar as a big city in Indonesia also has not been adequate the sports area.

Although, many public areas used as sports field by the community in the morning or the afternoon. The form of the public sector is a garden city, the unutilized space, office yard and main city road. One program to motivate the community doing sports is Car Free Day.

CFD program was first carried out in the country of Netherlands and Belgium to reduce energy crisis on 25 November 1956 to 20 February 1957. On Apr il 19, 2001, program Earth Car Free Day (ECFD) held first and simultaneously throughout the world. More than 300,000 organizations and Cities around the world participated in the activities organized by The Commons WC/FD program and Earth Day Network.

Car - free day in Makassar City Government conducted is one form of initial steps as anticipation about the depletion of the reserves of resources. Another function, it has an asocial impact on the activities of the car - free day is to be the event gathering any visitors from various social levels. The CFD program will be a positive influence for the fraternity between people who are present in the car - free day activities.

The car - free day in the city of Makassar can also represent the desire of visitors to come t o Makassar. The event s that performed in the game s of the car - free day like sports, education, entertainment, and much more . The support facilities in the cities affected the increas e of community motivation to doing activities.

Furthermore, the motivation for the controlling action of a human [4], [5] . Public space is one kind of city facility for the community has are creational function [6] . Based on the community motivation with the city facilities, this research elaborates the interest and motivation of community to doing s ports in public space.

The availability of open space in the city is the most critical part of the game for the formation of society's cultural atmosphere conducive sport [7] . The culture of the game in question is within the scope of the complete sports coverage, namely sports covering the achievements, sports education, sports and community recreation or sports.

Public facilities, public space, open space or even the action is a prerequis ite for the formation of the collective behavior of the community to develop the exercise culture. In

the context of Community Sports/Fitness/Recreation, open space leads to the concept of public space are more varied. Open space community sports/fitness/recreation can be either gymnastics group, Futsal Court, square, court settlements, as well as the various forms of family recreation facility that now this lively developed in several cities in the country.

The provision of open space recreational sports often arises from the creative power of the community in addressing the issue of limited land [8]. Cities sometimes have to get creative to conjure up the parking lot for a game of tennis or gymnastics [9]. The community must also be creative when scheduling should utilize open space used for sports achievements.

The town does little sports recreation due to a charging leisure. Spare time and free space. The location of the car-free day in Makassar city located along the street entertainers (Losari Beach). This site is approximately 1100 m length, and the scenery of the area is charming and a wide range of relaxation.

Some people exploit the situation by engaging in sporting activities such as gymnastics of physical freshness, stroll, bike or just simply make jogging. 2. Method This type of the investigation is quantitative data which are collected and processed in the form of figures and numbers. The number of the sample is 60 respondents who represented the communities are using public space in Makassar.
