Dear Pince Salempa et al.

We have reached a decision regarding your submission to International Journal on Advanced Science, Engineering and Information Technology (IJASEIT), "17,18-Dihydroxyl Montecristin Compound from the Stem Bark of the Soursop (*Annona muricata* Linn)". For your information, please respond the comments by the reviewers below.

Reviewer 1:

The authors have to correct the spellings errors. All the Latin word should be in italics. The authors should clarify the aims of the research in page 3 paragraph 2. The author should make clear figure on compound structure of 17,18-dihydroxy *montecristin* and the structure of *montecristin* and 17,18-dihydroxy *montecristin*. I recommend this paper is accepted with correction.

Reviewer 2:

The Latin word, especially for "*A.Muricata*" as the concern of this research must be written in italics. The last paragraph and the first sentence in page 2 is wordiness requires the clear statement. The first paragraph in page 3 requires to be rearranged to explain the function of the sample of the research. Line 4 until until the end of the first continued paragraph on column 1 in page 4 require rewording to explain the clear procedure of conducting the experiment. The authors should visualize the FT-IR and ¹H-NMR spectrum of the experiment for good readership.

Our decision is: Revisions Required

Best regards,
