ABSTRACT

After the Covid-19 pandemic, all life systems, and cultures, especially in the educational sector, changed. The changes happened not only in the learning system and model that applied blended learning but also in students' habits to avoid the spread of Covid-19. The habits here included the use of hand sanitizer, hand washing, and the use of a mask. Nowadays, various sectors, including education, have entered the post-covid-19 endemic period. Nowadays, the challenge is ensuring that each student at school can consistently grow their care on clean living culture and consciously become accustomed to it, consistently washing hands, wearing a mask, and using hand sanitizer. Elementary school students are susceptible to being massively infected by the virus, so they should continuously receive integrative and systematic understanding through information media. One of the information media mostly used by students is comics. The comic is a literation media combing text and picture which presents a particular message that can be quickly understood so that it is effectively delivered. Comics can increase students' interest in reading, especially if designed digitally. The study developed and integrated e-comic into Android for students. The use of comics, a familiar media for students, effectively embeds the concept, understanding, and positive habit on elementary school students to live peacefully with the Covid-19. Growing students' habits to be aware of wearing a mask, washing hands, keeping a distance, and obeying the health protocol at school can be facilitated using e-comic, which grows students' life skills in avoiding the spread of Covid-19.
