Notification of Abstract Submission to MSCEIS 2019 and Requiring Full Paper Submission

1 pesan

MSCEIS UPI <msceis@upi.edu>
Kepada: khaeruddin@unm.ac.id

12 September 2019 pukul 16.44

Dear MSCEIS 2019 Authors,

Based on the review result, congratulations we inform you that your abstract # **275** is **ACCEPTED** so that your Full Paper is eligible for the Full Paper review process. Regarding this, you are required to **submit your FULL PAPER** via your MSCEIS 2019 account before **September 15, 2019 at 23:59:59 WIB**.

Herewith we remind you to **full fill your registration fee** (full payment/non-early bird payment) before **October 4, 2019** at 23:59:59 WIB and **submit Payment Proof and Student Card** (if the first author is a student) via your MSCEIS 2019 account. The registration fee should be paid by bank transfer to:

Bank: Bank Negara Indonesia (BNI)
Account Holder Name: BENDAHARA MSCEIS
Account Number: 0709905948
Swift Code: BNINIDJXXX

Moreover, **Mathematics, Science, and Computer Science Education International Seminar (MSCEIS) 2019** will be held on:

Day, Date : Saturday, October 12, 2019
Time : 07.00-17.00 WIB
Venue : Grand Mercure Hotel, Bandung.

For further information, please visit the MSCEIS 2019 website: <http://msceis.org>, contact to msceis@upi.edu, or Hp: Eka Cahya Prima: 0857-9324-5289. Moreover, please **check your account regularly** and the website <http://msceis.org> for the newest information.

NOTE:

Ignore This Email IF YOU HAVE SENT Your Manuscript and Payment Proof.

Thank you for your attention and kind regards,

MSCEIS 2019 committee

Khaeruddin Fisika <khaeruddin@unm.ac.id>

MSCEIS 2019 : Payment Proof for Abstract ABS-275

1 pesan

MSCEIS 2019 <msceis2019.automail@upiconf.org>

3 Oktober 2019 pukul 14.17

Balas Ke: msceis@upi.edu

Kepada: khaeruddin@unm.ac.id

Cc: msceis@upi.edu

Dear Dr. Khaeruddin Khaeruddin,

Payment proof for the following abstract has been confirmed.
Payment receipt can be printed directly from your account.

Abstract ID: ABS-275

Title: Development and Validation of Critical Thinking Skills Instruments of Physics Subjects

Author: Khaeruddin (a), Bunga Dara Amin (a)

Presenter: Dr. Khaeruddin, S.Pd., M.Pd.

Paid amount: IDR 2,500,000

Payment receipt can be printed directly from your account as follows:

- Login to your account
- Click "Abstract" on the top menu
- Click "Print Payment Receipt" button below your abstract

Thank you.

Best regards,

MSCEIS 2019 Organizing Committee

Paper Revision and Registration Fee Payment Reminder

1 pesan

MSCEIS UPI <msceis@upi.edu>
Kepada: khaeruddin@unm.ac.id

8 Oktober 2019 pukul 11.50

Dear MSCEIS 2019 Authors,

Based on the review result, congratulations we inform you that your FULL PAPER #275 is **ACCEPTED** to be presented in **oral** (parallel) session of MSCEIS 2019. To improve your full paper, please find the following reviewers' comments at below. Also, please submit the revised paper to the system **before October 15, 2019 at 23:59:59 WIB** and please upload your presentation file before **October 11, 2019 at 23:59:59 WIB** to bit.ly/MSCEIS2019 using the file name format **ABS-number**.

Herewith we remind you to **fulfill your registration fee** (please check the fee at <https://msceis.org/2019/#/submission>) before **October 10, 2019 at 23:59:59 WIB** and **submit Payment Proof and Student Card** (if the first author is a student) via your MSCEIS 2019 account. The registration fee should be paid by bank transfer to:

Bank	: Bank Negara Indonesia (BNI)
Account Holder Name	: BENDAHARA MSCEIS
Account Number	: 0709905948
Swift Code	: BNINIDJXXX

Moreover, **Mathematics, Science, and Computer Science Education International Seminar (MSCEIS) 2019** will be held on:

Day, Date	: Saturday, October 12, 2019
Time	: 07.00-17.00 WIB
Venue	: Grand Mercure Hotel, Bandung.

For further information, please visit the MSCEIS 2019 website: <http://msceis.org>, contact to msceis@upi.edu, or Hp: Eka Cahya Prima: 0857-9324-5289. Moreover, please **check your account regularly** and the website <http://msceis.org> for the newest information.

NOTE:

Ignore This Email IF YOU HAVE SENT Your Manuscript and Payment Proof.

Thank you for your attention and kind regards,

MSCEIS 2019 committee

Reviewers' Comments:

Please change the format.

There is no conclusion in the abstract.

Please give some explanation about physics content and more explanation about critical thinking skill in introduction because introduction is too short.

Add more references especially in form of article.

Please give an example of instrument.

Book of Program and Uploading Presentation file of MSCEIS 2019

Dear MSCEIS 2019 Presenters and Participants,

Herewith we attach the **Book of Program** for Mathematics, Science, and Computer Science Education International Seminar (MSCEIS) 2019.

MSCEIS 2019 will be held on:

Day, Date: Saturday, October 12th, 2019

Time: 07.00-17.00 WIB

Venue: Grand Mercure Hotel, Bandung.

For **all oral presenters** (list can be seen in the Book of program), please upload your presentation file (.ppt/.pptx) to bit.ly/MSCEIS2019 with format name:

Abstract-Number_Presenter Name, (i.e. **ABS-001_Mahya.pptx**) before **11th October 2018 at 23:59:59 WIB**.

For **all poster presenters** please bring your poster (standing X-banner format) **at the conference day**.

We are looking forward to meeting you at the conference venue.

Thank you for your attention,

MSCEIS 2019 committee

Permintaan pengiriman paper MSCEIS 2019 dalam format .doc

3 pesan

MSCEIS UPI <msceis@upi.edu>
Kepada: khaeruddin@unm.ac.id

27 Januari 2020 pukul 19.41

Kepada Yth Author MSCEIS 2019

Dimohon untuk segera mengirimkan ulang paper yang disubmit ke msceis 2019 dalam format doc/docx dengan me-reply email ini.

No ABS : ABS-275

Judul paper : Development and Validation of Critical Thinking Skills Instruments of Physics Subjects

Kami tunggu selambat-lambatnya Selasa 28 Januari 2020 karena kami akan segera melakukan proses submission ke EAI publisher. Jika setelah tanggal tersebut kami belum menerima file yg dimaksud, artikel tidak dapat kami submit/publikasikan ke EAI Core Series. Atas perhatian dan kerjasamanya, Kami ucapkan terima kasih.

-Tim Editor MSCEIS 2019-

Khaeruddin Fisika <khaeruddin@unm.ac.id>
Kepada: MSCEIS UPI <msceis@upi.edu>

28 Januari 2020 pukul 13.45

Kepada Yth Tim Editor MSCEIS UPI 2019

Bersama ini, saya kirim ulang paper dalam format doc/docx.

adapun Judul paper : Development and Validation of Critical Thinking Skills Instruments of Physics Subjects

No ABS : ABS-275

Atas perhatian dan kerjasamanya, Kami ucapkan terima kasih.

Makassar, 28 Januari 2020

Hormat Kami,

KHAERUDDIN

MSCEIS 2019-Author's approval for the publication ID paper: ABS-275

2 pesan

MSCEIS UPI <msceis@upi.edu>
Kepada: khaeruddin@unm.ac.id

12 Februari 2020 pukul 21.10

Dear Corresponding Author,

We are in process of publishing the MSCEIS 2019 to EAI publisher. During the publication process, there are copyediting process to adapt the EAI format. To make sure that no errors have inadvertently been introduced, we would ask you to kindly check the final manuscript attached. You may either approve it or revise it without changing the EAI format. Send us your reply no later than February 13, 2020 23:59 WIB. If you have not responded by then, the paper is automatically considered to be approved.

For reminding you, the abstract should contain at least 70 words and at most 150 words. And the manuscript must be at least 4 pages and no more than 10 pages.

Best Regards,

Editors Team.

Development and Validation of Critical Thinking Skills Instruments of Physics Subjects

Khaeruddin¹, Bunga Dara Amin²
{khaeruddin@unm.ac.id¹}

Lecturer in Physics Education Study Program, Universitas Negeri Makassar, Indonesia
Jl. Daeng Tata Raya Kampus Parangtambung UNM Makassar 90224^{1,2}

Abstract. The Indonesian curriculum explicitly states that critical thinking skills as Higher Order Thinking Skills (HOTS) and future competencies must be taught to students to answer the challenges of globalization and be able to adapt to changes and respond to the demands of the 21st century. Therefore, this paper explains the development and validation of instruments of critical thinking skills to assess the ability to interpret, the ability to analyze and the ability to infer students. Specifically, critical thinking skills tests are designed based on the basic competencies of high school physics subjects in the form of essays that are equipped with an assessment rubric. Evidence of content validity, construct validity, and reliability are presented as the reliability of the critical thinking test instrument.

Keywords: Critical Thinking Skills, Instrument Development, Instrument Validation

1 Introduction

The results of the international study Program for International Student Assessment (PISA) show the achievement of reading literacy, mathematical literacy, and scientific literacy achieved by Indonesian students is very low. This means that Indonesian students are very low in (1) understanding complex information; (2) theory, analysis and problem solving; (3) use of tools, procedures and problem solving; and (4) investigating. In addition, the results of Khaeruddin's research [1] in several High Schools (SMA) in Makassar (SMAN 2 Makassar, SMAN 9 Makassar, SMAN 10 Makassar, SMAN 14 Makassar and SMAN 15 Makassar) show that: (i) the formulation of the assessment or questions is only product-oriented cognitive, even none of the questions that lead to cognitive processes, namely Higher Order Thinking Skills (HOTS), (ii) low critical thinking skills of students in high school, namely the average value of students interpreting, analyzing, and inference respectively 1.53, 1.15, and 1.52 of the maximum value that students might obtain is 10. Even the results of Khaeruddin's research [1], critical thinking skills of students in high school are still low, namely the average value of students doing interpretation, analysis, and inference respectively 32.29, 36.32, and 41.67 of the maximum value that may be obtained by students is 100. Whereas the demands of the Indonesian Curriculum expressly express critical thinking skills as future competencies that must be taught to students to answer the challenges of globalization and be able to adapt to changes and respond to the demands of the 21st century. Based on the above facts, this research aims to develop and produce a reliable critical thinking assessment to optimize the HOTS ability of students through Physics in high school.

2 Method

This research is developing critical thinking assessment through Physics in order to optimize the HOTS of students in high schools. Therefore, the research design is the Educational Design Research (EDR). The Indonesian curriculum explicitly states that critical thinking skills as future competencies must be taught to students to answer the challenges of globalization and be able to adapt to changes and respond to the demands of the 21st century. To achieve the objectives of this research, the activities carried out are adjusted to the 2019 research roadmap, namely: (i) reviewing several journals, learning theories, Model of Teaching (MoT) relating to "critical thinking". Based on some opinions, almost unanimous experts (N>95%) include analysis and inference as the core of critical thinking skills and there is a strong expert consensus (N>87%) which states that interpretation is also the core of critical thinking skills [2] such as Burden & Byrd [3]; Beyer [4]; Rudinow & Barry [5], the researchers state that critical thinking skills are thinking skills that involve high-level cognitive processes, namely interpretation, analysis, and inference through scientific procedures in order to solve problems. Therefore, the authors make as an indicator of critical thinking skills are interpretation, analysis, and inference; (ii) Basic Competency (BC) analysis of Physics subjects in the 2013 Curriculum. The basic competencies analyzed are the materials of Straight Motion with Constant Speed and Acceleration [6].

Table 1. Basic Competence of Senior High School Class X.

“Straight Motion with Constant Speed and Acceleration”

Basic Competence (BC)
2.1. Demonstrate scientific behavior (have curiosity; objective; honest; conscientious; meticulous; diligent; cautious; responsible; open; critical; creative; innovative and care for the environment) in daily activities as a form of implementing attitude in conducting experiments, report, and discuss.
3.3. Analyzing physical quantities in straight motion with constant velocity and straight motion with constant acceleration.
4.3. Present data and graphs of experimental results to investigate the nature of the motion of objects that move straight at a constant speed and straight motion with constant acceleration.

Table 1 above found key words on basic competencies such as scientific behavior (including curiosity, objective, honest, thorough, careful, diligent, cautious, responsible, open, critical, creative, innovative and caring for the environment), conduct experiments and discuss, analyze, present data and graphs. These keywords correspond to indicators of critical thinking skills. Even the suitability is shown from the definition which states that critical thinking skills are thinking skills that involve high-level cognitive processes, namely interpretation, analysis, and inference through scientific procedures in order to solve problems; (ii) formulating indicators based on BC as a reference for assessment; Basic Competence 2.1, is translated into several indicators of achievement of BC 2.1 as an affective indicator. The results of the formulation of affective indicators, namely 2.1.1. show perseverance in conducting experiments; 2.1.2. Showing responsibility in conducting experiments. Basic Competence 3.3, is translated into several indicators of achievement of BC 3.3 as an indicator of knowledge. The results of the formulation of indicators of knowledge/cognitive products oriented to Critical Thinking Skills (CTS), namely 3.3.1. interpret data based on the relationship between the slope magnitude and the travel time; 3.3.2 Analyze truck trip data; 3.3.3 Referencing based on the

graph of Juanita and Heather's trip to the beach. Basic Competence 4.3, translated into several indicators of achievement BC 4.3, translated into several indicators of achievement BC 4.3 as an indicator of knowledge/Cognitive Performance (Science Process Skills), which is 4.3.1. Formulate problems, formulate hypotheses, identify variables, formulate operational definitions of variables, make tables, make graphs, analyze, interpret, draw conclusions from experimental results about the effect of slope on travel time; (iii) design the assessment based on critical thinking indicators by adjusting BC achievement indicators. The CTS assessment was designed in the form of essays totaling 12 question items. The details of the number of question items are as in Table 2 below.

Table 2. The number of questions for each indicator of CTS.

Critical Thinking Skills	Item Number	Number of items
Interpretation	1,2,3,4	4
Analysis	5,6,7,8	4
Inference	9,10,11,12	4

The design of critical thinking skills assessment refers to the CTS description as shown in Table 3.

Table 3. The domain of scientific literacy competence on instruments.

Indicators	Descriptions
Interpretation	Rational explanation of the data analyzed is based on patterns or tendencies that are described from graphs or tables [7]
Analysis	a. Data is organized in the form of tables, graphs and/or diagrams b. Explain data patterns that show relationships between variables. [8,7]
Inference	Explain an idea or express initial conclusions based on observations or statements [2].

Because the critical thinking skills test is designed in the form of an essay, then to correct the answers to the questions formulated assessment guidelines (rubrics) to be objective.

3 Results

The instrument tests validation of CTS through face validation conducted by two experts using the expert judgment method. Face validation refers to the material, construction and language. In detail the results of the validation as shown in Table 4.

Table 4. Validation results of CTS tests.

No.	Rated aspects	Validator (V)		Diffe- rence	Reliabi- lity (%)
		V1	V2		
I Theory					
1	The items in accordance with the indicators	4	4	0	100.00
2	the contents of the material in accordance with the measurement objectives	4	4	0	100.00
3	the contents of the material in question in accordance with the level of education	4	4	0	100.00
II Construction					
4	The items are clearly formulated	4	4	0	100.00
5	The formulation of the problem is formulated firmly	4	4	0	100.00
6	The discourse, picture or graphic really works and has something to do with the problem in question	3	4	1	85.71
7	Between items do not depend on each other	4	4	0	100.00
III Language					
8	Communicative sentence formulation	3	3	0	100.00
9	Sentences use good and correct language	4	4	0	100.00
10	The sentence formulation does not lead to a double interpretation	3	3	0	100.00
11	Use common language and/or verbs (not local language)	4	4	0	100.00
	Total	41	42	1	98.80
	Average	3.73	3.82		

Note: 1: bad, 2: good enough, 3: good, 4: very good

Table 4 shows that the items that have been developed have good quality, this is evidenced by the results of the validation of the validator giving a rating of 4.00 (content validation) and 3.75 (construct validation) for the material of straight motion with the level of reliability of each amounted to 100.00% and 96.87%. This is supported by communicative sentence formulation, using good and correct language, sentence formulation does not lead to multiple interpretations and uses common language and verbs (not local language). In general, each validator gave an assessment of 3.73 and 3.82, including the category of very valid with a reliability level of

98.80%. This shows that the items in accordance with the indicators, measurement objectives, and education levels can be relied upon consistently measuring HOTS, namely critical thinking skills. The validation results above support the Curriculum of 2013 which requires the use of assessment oriented to HOTS. In the context of education based on standards (standard-based education), curriculum based on competency (competency-based curriculum), and the mastery learning approach to the assessment of the process and learning outcomes are parameters of the level of achievement of minimum competency. Thus, various approaches, strategies, methods, techniques, and learning models need to be developed to facilitate students to easily learn and achieve optimal learning success. Therefore, in learning science, tests should apply scientific literacy which is an element of life skills that must be the result of education. In addition, scientific literacy is one of the domains of assessment in the PISA. Science literacy is the ability needed (need) to be taught to students for life in the future both as individuals and as members of society.

4 Conclusion

Item Critical Thinking Skills that have been developed through expert judgment have good quality. However, to test its reliability, an empirical test will be conducted.
