✓ Open Access ✓ Performing Peer Review ✓ Fast Publication: 40-90 Days

Dear Benny B;M. Rachmat Kasmad,

Science Research (SR) is a peer-reviewed academic journal, which provides a solid platform for all academics, scholars and those who are interested in emerging trends and issues in science research to exchange ideas.

Greatly attracted by your work entitled "*The Application of Creative Play Approach Model on Improving Passing and Dribble Learning Outcomes in Football Game*", we wholeheartedly invite you to contribute papers and join our Editorial Panel/Reviewer Team.

Editorial Board Member/Reviewer Recruitment

We have been devoted to making **SR** one of the top journals in the world. Distinguished experts are cordially welcomed to join the Editorial Board/Reviewer Panel.

Are you interested in being an editorial board member or a reviewer?

You can get more details at the following link: <http://www.srjournal.org/joinus/yN14P>

Benefits of Joining Us as an Editorial Board Member/a Reviewer

- ① Quickly boost your visibility in your research field.
- ② Be accessible to first-hand information on current scientific findings.
- ③ Obtaining an official Certificate (PDF format) issued by the editorial board.
- ④ Having your name and affiliation shown on our journal's official website.

Invite You to Submit Unpublished Papers to the Journal

SR was launched with the intention of promoting academic communication worldwide in a more effective and efficient manner.

During the past years, numerous scholars have contributed a lot of articles to the journal. **We would like to invite you to send other unpublished works of relevant fields to the journal.** Further research on the topic of this paper will also be welcomed. With your contribution, scholars in your research area will definitely get inspired in the process of academic research.

If you want to submit your article, please visit our website:

<http://www.srjournal.org/submission/yN14P>

The following is your paper's title and abstract:

The title of the research: *The Application of Creative Play Approach Model on Improving Passing and Dribble Learning Outcomes in Football Game*

The abstract of the research: The purpose of this research is to explore the improvement of football learning outcomes (passing and dribble) through a creative play approach at class VII of students at Junior high School 24 Makassar. The research method in this study used the class action research approach. The instrument used

in this study is a portfolio sheet. Based on the results of the research, in the form of initial activities, follow-up activities (cycle I) and cycle II through a model of creative play approach, it is found that the ability to improve passing and dribbling ball has been significantly improved in playing football. In the initial cycle, only 30% of students completed the actions in learning, and 70% of students have incomplete actions. The result also indicates that there was an increase of up to 53.33% in the first cycle and 93.33% in the second cycle. Therefore, the conclusion is that the creative play approach can increase the value of learning outcomes from 69.4 to 81.9.

Yours sincerely,

Editorial Office of *Science Research*
