Ansari Saleh Ahmar:

Thank you for submitting the manuscript, "Application of Neural Network Time Series (NNAR) and ARIMA to Forecast Infection Fatality Rate (IFR) of COVID-19 in Brazil" to JOIV : International Journal on Informatics Visualization. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL: <http://joiv.org/index.php/joiv/author/submission/372>

Username: ansarisaleh

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Ansari Saleh Ahmar:

We have reached a decision regarding your submission to JOIV : International Journal on Informatics Visualization, "Application of Neural Network Time Series (NNAR) and ARIMA to Forecast Infection Fatality Rate (IFR) of COVID-19 in Brazil".

Our decision is to: Revisions Required

Enclosed are your reviews. If you should choose to revise your paper, please prepare a separate document describing how each of the reviewers' comments were responded to in your revision and submit through JOIV editorial system within 30 days.

Please upload your revision and summary of changes to JOIV editorial system at <http://joiv.org/index.php/joiv>

Editor

Reviewer F:

This paper is good but there are revision:

Modeling the COVID-19 in Brazil countries due to the forecast aspects is of utmost importance. The manuscript proposes a NNAR and ARIMA model. Although the epidemiological method is not novel, the data and case study is considered novel and the manuscript can be published after minor revisions.

I suggest having four paragraphs in the introduction for; describing the concept, research gap, contribution, and the organization of the paper. The motivation has the potential to be more elaborated. You may add materials on why doing this research is essential, and what this article would add to the current knowledge, etc. The originality of the paper is not discussed well. The research question must be clearly given in the introduction, in addition to some words on the testable hypothesis. Please elaborate on the importance of this work.

Without including these newly published papers, the acknowledgment of the past related work by others, in the reference list, cannot be sufficient. Accordingly, the contribution of the paper can be more clear. Furthermore, consider elaborating on the suitability of the paper and its relevance to the journal. Kindly note that references cited must be up to date. Elaborate on the method used and why used this method. Limitations and validation are not discussed adequately. The research question and hypothesis must be answered and discussed clearly in the discussion and conclusions.

Reviewer I:

The paper is well written and well presented and can be accepted in its current version.
