"IMPROVING THE SYSTEM OF PEDAGOGICAL EDUCATION IN THE NEW REALITY OF KAZAKHSTAN: TECHNOLOGICAL AND METHODOLOGICAL ASPECTS OF THE FORMATION OF FUTURE TEACHERS DIGITAL-CREATIVE COMPETENCIES IN DISTANCE LEARNING"

Abstract

The article defines the technological and methodological aspects of the formation of digital creative competencies of future teachers in the conditions of distance education in the Republic of Kazakhstan and reveals the essence of the concepts: "competence", "digital competence", "digital-technological competence", "digital-methodical competence", "creativity", "smart" model and didactic characteristics of digital technologies.

In the article, the essence of the components of competence is characterized in a new context: organizational ability; empathic ability; reflexive ability.

If, in the conditions of distance learning, the digital and technological competence of a future teacher is determined by the formation of his skills and abilities to work with Internet resources, digital learning platforms, modern computer programs, multimedia devices, then the digital and methodological competence of a future teacher is characterized by his ability to create an electronic portfolio, an electronic media library and the organization of pedagogical coaching and pedagogical trainings.

The content is revealed and a new model of the formation of digital-creative competencies of future teachers in the conditions of distance learning is proposed - pedagogical educational portal www.smart-pedagog.kz.

The article presents and analyzes the results of the online test "Smart- future teacher".

The research within the framework of the grant project AP09259497 "Improving the system of pedagogical education in the new reality of Kazakhstan: technological and methodological aspects of the formation of digital competencies of future teachers in distance learning of the Republic of Kazakhstan" is funded by the Ministry of Education and Science of the Republic of Kazakhstan.

The following message is being delivered on behalf of World Journal on Educational Technology: Current Issues.

WJET Review Form (new_Fall 2018)

Please indicate your choice by checking the appropriate box.

1. The keywords accurately reflects the content. *

The number of keywords exceed an ideal number of keywords. Keywords should be a maximum of five.

The manuscript adequately ties to the relevant literature.

The manuscript partially ties to the relevant literature.

2. The title of the manuscript is appropriate. *

The title of the manuscript is appropriate

Methodology decisions (e.g., coding of data, data analysis, significance levels)

3. The abstract accurately reflects the content. *

The abstract has not formatted in the right manner. Abstracts should be one paragraph.

Methodology decisions are not explained clearly

4. The research problem is clearly defined. *

The research problem is unclear.

The research design is partially adequate to achieve the study's objectives.

5. The manuscript contains new findings or ideas. *

The manuscript contains no new findings since the introduction section cites no prior research related to the topics.

Data collection tools and procedures are clearly described.

Data collection tools and procedures are partially described.

6. The manuscript adequately ties to the relevant literature. *

The manuscript partially ties to the relevant literature.

Data analysis decisions are partially explained.

7. Methodology decisions (e.g., coding of data, data analysis, significance levels, grouping of subjects, sampling) adequately explained.

There is no discussion section in the manuscript

*

Methodology decisions are not explained clearly.

12. The recommendations are accurate and supported by findings and conclusions.

8. The research design is adequate to achieve the study's objectives. *

The research design is partially adequate to achieve the study's objectives

13. The references are up-to-date, complete, and appropriate (APA 6 Style).

9. Data collection tools and procedures are clearly described. *

Data collection tools and procedures are partially described

14. The research is systematic and consistent.

10. Data analysis decisions are clearly explained. *

Data analysis decisions are partially explained

15. Appropriate and accurate language is used.

11. The discussion /conclusion section(s) adequately discuss (es) the findings. *

There is no discussion section in the manuscript

12. The recommendations are accurate and supported by findings and conclusions. *

The recommendations are partially accurate and supported by findings and conclusions.

13. The references are up-to-date, complete, and appropriate (APA 6 Style). *

Most of the references are older than 5 years. The reference also does not use APA style.

14. The research is systematic and consistent. *

The research is not systematic

15. Appropriate and accurate language is used. *

Appropriate and accurate language is used

Optional: required field

Your Additional Comments *

The manuscript shows a weak research methods. The methodology are not explained clearly. The discussion section is also missing from the manuscript. The overall formatting is also inappropriate, especially paragraph structure and reference.
