We have reached a decision regarding your submission to International Journal of Interactive Mobile Technologies (iJIM), "Intrusion Detection Alert".

Our decision is to: Resubmit for Review

Reviewer D:

Globally, the manuscript is very well written and organized. However, there are some English errors that should be corrected in the commented document, where some of these errors are noted. In this document there are other minor suggestions of corrections. We also recommend a thoughtful reading of the manuscript so that other English errors and style can be corrected.

It would be interesting that, in the future, the system automatically sent alerts to the user when an electric device is "needing" even being the system able to turn the device on or off (automatically).
