Indrayani Indrayani:

Thank you for submitting the manuscript, "Isolation and Characterization of Extremophile Bacteria from Waepella Hot Spring for Hydrolytic Enzyme Production" to Biodiversitas Journal of Biological Diversity. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Submission URL: <https://smujo.id/biodiv/authorDashboard/submission/12513>
Username: skeletonemauho29

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Ahmad Dwi Setyawan

Indrayani Indrayani:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Isolation and Characterization of Extremophile Bacteria from Waepella Hot Spring for Hydrolytic Enzyme Production".

Our decision is: Revisions Required

Reviewer A:

Dear Author,

1. Introduction is about 600-700 words, covering the aims of the research and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Please add some references that support your research background
2. This manuscript has lacks references. At least, you need to compose a minimum of 20 references which 80% of scientific journals published in the last 10 years (2012-2022), and a maximum of 10% of references in local references.
3. Please write the references based on the author's guidelines. Kindly check the author's guidelines here <https://smujo.id/biodiv/guidance-for-author>.
4. Please include the Digital Object Identifier (DOI) address from each of references

Kindly check and correct accordingly.

Thank you

Recommendation: Revisions Required

Reviewer B:

1. I see that the abstract is quite clear and concise, and because it includes the expected background, methods and research results, however my suggestion is to combine the keywords extremophile and bacteria, and add the hot spring, location and the name of the place Waepella Sinjai Regency, South Sulawesi
2. The introduction is clear enough to provide background on this research as well as complete information about the development of research like this in Indonesia, however but there is a writing error on inhibited which should be inhabited
3. In materials and methods, my suggestion is to combine several enzyme activity tests in a separate sub-chapter, not to be combined with other characteristics. Also combine the explanations of the stages of the same enzyme activity test into one, and only mention the differences such as the media used for each or the method of evaluation. It is also necessary to add or specify how to measure the diameter of the clear zone, whether it includes a paper disk or not.
4. Writing corrections for all parts, such as writing the name of the inventor with a capital letter at the beginning of a word (Gram, Bunsen, Lugol), also enough lowercase letters for the meaning of the abbreviation CMC (carboxy methyl cellulose), for the location of placing S and E behind coordinate numbers. In Table 2: Eliminate the double word hot springs, correct the Katalase writing, and consistently write the initial letters of negative and positive whether uppercase or lowercase
