Indrayani Indrayani:

Thank you for submitting the manuscript, "Growth, biomass and lipid productivities of a newly isolated tropical marine diatom, Skeletonema sp.UHO29, under different light intensity" to Biodiversitas Journal of Biological Diversity. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Submission URL: <https://smujo.id/biodiv/authorDashboard/submission/5266>  
Username: skeletonemauho29

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Reviewer A:

This paper reports a well-executed empirical study on the effects of differences in light intensity on the growth and lipid production of the microalga *Skeletonema* sp. UHO29 recently from the waters of Southeast Sulawesi. It is a very well written paper. I recommend its publication after the suggested editorial changes are completed. In the attached SHOW CHANGES file, there are several comments for the authors' consideration. The TIDY VERSION file deletes these comments and incorporates the suggested editorial changes. Thank you for giving me the opportunity to learn about your important work.

Recommendation: Revisions Required
