Article Title: Development of Self Instruction With Structured Learning Approach To Reduce Academic Procrastination of Junior High School Students
Reviewer's Name: Hendra Jaya
(The reviewers' identities remain anonymous to author/s)

❖ **Recommendation to Editor** (Please mark "x" for appropriate option)

( ) Excellent, accept the submission (5)

( ) Good, accept the submission with minor revisions required (4)

(**X**) Acceptable, revisions required (3)

( ) Reconsider after Major Revisions (2)

( ) Reject the submission (1)

The editor will forward the section below to author/s

❖ **Evaluation** (Please evaluate the manuscript by grade 1-5)

5=Excellent	4=Good	3=Average	2=Below Average	1=Poor

Items	Grade	Comments
Originality/Novelty	4	In the presentation, the data still needs to be interpreted in depth if it is necessary to use graphs. In conclusion, the impact has not been seen after using the data model regarding "to reduce academic procrastination", the data has not been presented in the title, which is what this article will achieve.
Significance	3	the quality of data presentation is still minimal
Quality of Presentation	3	The research has been designed according to the proposed methodology.
Scientific Soundness	3	In the discussion it has been described quite well.
Interest to the Readers	4	The conclusion needs to be improved because it does not provide the reader with the information as described in the title
Overall Merit	4	the idea and topic of the article is quite good…..but it has not been presented in detail
English Level	3	The use of Indonesian is translated into English, because many people still use Indonesian. Except for things that the Substance does not need to be changed...

❖ **Simple Comment**
Overall this article is good, but the conclusion is not in accordance with the title and

1

what will be discussed

❖ **Broad Comments**

This article develops an approach and then how it can reduce procrastination. for the discussion has been described quite well. However, it is necessary to explain the important points related to what the researcher has done by referring to research from other sources. The bibliography should be enriched with references to the Journal of the Last 5 Years

❖ **Suggestions to Author/s**

Good, accept the submission with minor revisions required

Note:

Referring to line numbers, tables or figures. Reviewers need not comment on formatting issues that do not obscure the meaning of the paper, as these will be addressed by editors.

Evaluation Items

- *Originality/Novelty:* Is the question original and well defined? Do the results provide an advance in current knowledge?
- *Significance:* Are the results interpreted appropriately? Are they significant? Are all conclusions justified and supported by the results? Are hypotheses and speculations carefully identified as such?
- *Quality of Presentation:* Is the article written in an appropriate way? Are the data and analyses presented appropriately? Are the highest standards for presentation of the results used?
- *Scientific Soundness:* is the study correctly designed and technically sound? Are the analyses performed with the highest technical standards? Are the data robust enough to draw the conclusions? Are the methods, tools, software, and reagents described with sufficient details to allow another researcher to reproduce the results?
- *Interest to the Readers:* Are the conclusions interesting for the readership of the Journal? Will the paper attract a wide readership, or be of interest only to a limited number of people?
- *Overall Merit:* Is there an overall benefit to publishing this work? Does the work provide an advance towards the current knowledge? Do the authors have addressed an important long-standing question with smart experiments?
- *English Level:* Is the English language appropriate and understandable?

Comments

- *Simple Comment*: The aim of the paper and its main contributions
- *Broad comments:* highlighting areas of strength and weakness. These comments should be specific enough for authors to be able to respond

Suggestions to Author/s

- *Accept in Present Form:* The paper is excellent without any further changes.
- *Good, accept the submission with minor revisions required:* The paper is in principle accepted after revision based on the reviewer's comments. Authors are given five days for minor revisions.

- *Reconsider after Major Revisions*: The acceptance of the manuscript would depend on the revisions. The author needs to provide a point by point response or provide a rebuttal if some of the reviewer's comments cannot be revised. Usually, only one round of major revisions is allowed. Authors will be asked to resubmit the revised paper within ten days and the revised version will be returned to the reviewer for further comments.

- *Reject:* The article has serious flaws, makes no original contribution, and the paper is rejected with no offer of resubmission to the journal.

Please return the form to the journal editor, thank you very much.
